3.3	Trials and Judgment	12
3.4	Insanity	12
3.5	Society, Development, and Personality in Criminal Behavior	12

1 An Introduction

1.1 What is This?

- Not for extra credit; sorry
- Slowing down, focusing on what was covered through the second half of class
- Reviewing what we've covered as part of preparation for the final exam, and creating an additional tool for study
- A mini-lecture on forensic/criminal psychology

1.2 4 Statements of Summary

- Psychology is more complex and connected than we think
- Understanding psychology at a *deep* level is *hard* and *time-consuming*
- Psychology isn't always interesting
- Each of you took the time to tread through a lot of content, even if it was difficult and/or boring

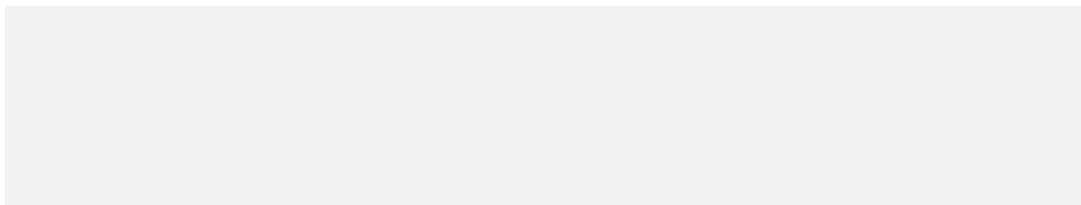

2 Overview of Topics Covered

2.1 Module 8: Memory

2.1.1 Topics Covered

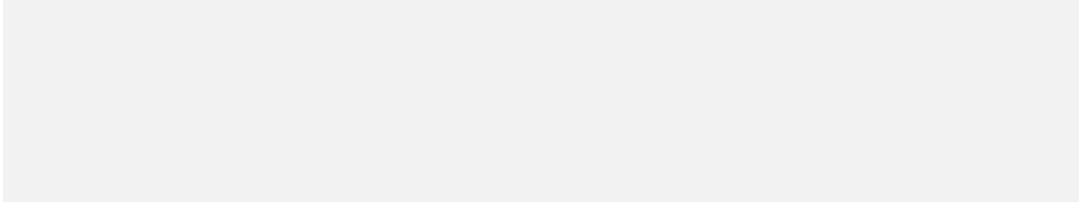

- The general flow and process of how experiences or stimuli become memories

 Discuss: Write down as much as you can about this topic

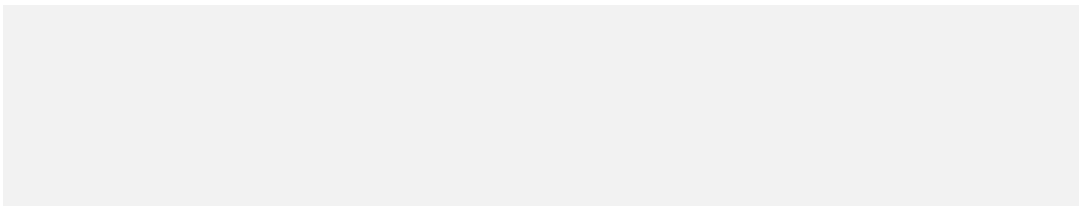

- Types of encoding

 Discuss: Write down as much as you can about this topic

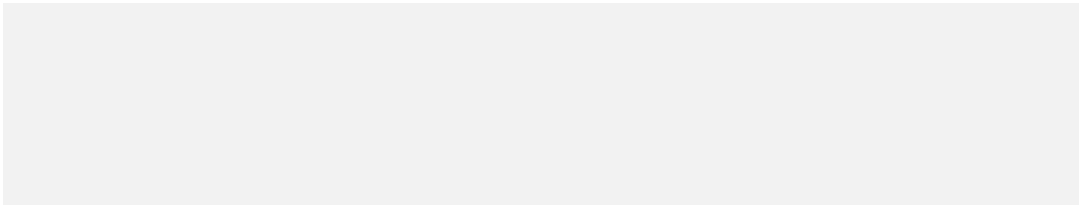

- Types of storage

 Discuss: Write down as much as you can about this topic

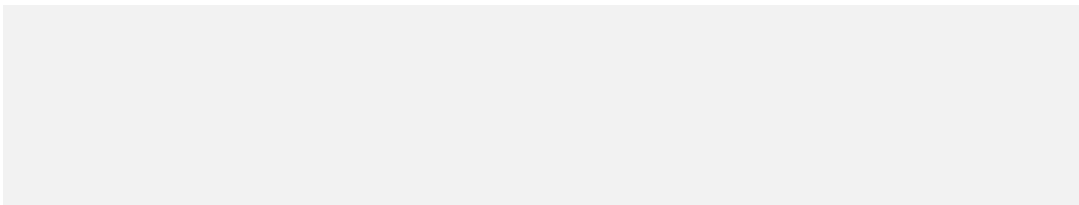

- Types of retrieval

 Discuss: Write down as much as you can about this topic

- Brain anatomy associated with specific types/functions of memory

 Discuss: Write down as much as you can about this topic

2.1.2 Review Questions

? Intentionally memorizing a phone number is an example of what type of processing?

- ☒ A) Basic
- ☐ B) Effortful
- ☐ C) Automatic
- ☐ D) Intense

Explanation:

📢 Discuss: Explain the differences between explicit and implicit memories, and try to list the types of each that we covered

2.2 Module 9: Lifespan Development

2.2.1 Topics Covered

- Different types/categories of development as discussed

📢 Discuss: Write down as much as you can about this topic

- Different perspectives and nuances on how development occurs

 Discuss: Write down as much as you can about this topic

- Different lifespan development theories and the focus and stages of each one

 Discuss: Write down as much as you can about this topic

2.2.2 Review Questions

 Which of the following theorists proposed stages of moral development?

- ☒ A) Jean Piages
- ☐ B) Lawrence Kohlberg
- ☐ C) Erik Erikson
- ☐ D) Sigmund Freud

Explanation:

 Discuss: Describe what the nature vs nurture debate is, in regard to our development

2.3 Module 10: Emotion and Motivation

2.3.1 Topics Covered

- Types of motivation

 Discuss: Write down as much as you can about this topic

- Different theories of motivation

 Discuss: Write down as much as you can about this topic

- Hunger and eating as an example of motivation

 Discuss: Write down as much as you can about this topic

- Components of emotion

 Discuss: Write down as much as you can about this topic

- Different theories explaining the process of feeling emotion

 Discuss: Write down as much as you can about this topic

2.3.2 Review Questions

 Motivation is described as leading to [BLANK]

- ☒ A) Behavior
☐ B) Perception
☐ C) Cognition
☐ D) Interest

Explanation:

 Discuss: Describe the differences between intrinsic and extrinsic motivation. How can extrinsic motivation eradicate or extinct intrinsic motivation?

2.4 Module 11: Personality

2.4.1 Topics Covered

- Historical perspectives on personality

 Discuss: Write down as much as you can about this topic

- In-depth discussion on the Freudian/psychodynamic/psychoanalytical perspective of personality development, consciousness, urges, and the different psychosexual stages

 Discuss: Write down as much as you can about this topic

- The “neo-Freudians” with expanded focus outside of personality development focused on just sex. Different theorists and their respective areas

 Discuss: Write down as much as you can about this topic

- Connections from learning and behaviorism to explain personality

 Discuss: Write down as much as you can about this topic

2.4.2 Review Questions

 Alfred Adler placed intense emphasis on feelings of [BLANK]

- ☒ A) Pleasure
☐ B) Coping
☐ C) Anxiety
☐ D) Inferiority

Explanation:

 Discuss: Which stage of psychosexual development might someone become fixed, resulting in a vain personality with its roots in unresolved romantic feelings for one's parent?

2.5 Module 12: Psychological Disorders

2.5.1 Topics Covered

- Defining what a “disorder” is through several different criteria and the APA definition

 Discuss: Write down as much as you can about this topic

- The different manuals and guides used for diagnosing and classifying disorders

 Discuss: Write down as much as you can about this topic

- Classes of psychological disorders and covered disorders under each umbrella

 Discuss: Write down as much as you can about this topic

2.5.2 Review Questions

 Which of the following is part of criteria for PTSD?

- ☒ A) Traumatic event must have occurred in childhood
- ☐ B) Results in accumulating useless goods in preparation
- ☐ C) Results in exaggerated startle responses
- ☐ D) Repeated traumatic events

Explanation:

 Discuss: Describe the 3 different ways to define disorder that we led up to before the APA definition

3 Forensic & “Criminal” Psychology Mini-Unit

3.1 Introduction

- Psychology often has applications related to the law + court system, as well as related to individual criminals and their behaviors

- Psychology can be involved as part of:
 - the tracking, “profiling”, and catching of suspects
 - the trials, judgement, and sentencing of criminal behaviors by courts and juries
 - the medical and psychological judgment on whether someone is “insane” or fit to stand trial
 - The experience of inmates when incarcerated, e.g., mental health
 - Understanding the likelihood of criminals re-offending or rehabilitating
 - Understanding the societal, developmental, and personality factors leading to criminal behaviors
 - and many other areas!

3.2 Profiling and Catching Suspects

- Does “profiling” as portrayed in media work?
 - Not really... - [Snook et al., 2007](#)
 - In fact, a lot of it may be an illusion and just very convincing - [Snook et al., 2008](#)

3.3 Trials and Judgment

- Are jurors truly impartial?
 - Of course not: implicit bias - [Korkmaz et al., 2023](#)
 - Can’t always trust memories we think are clear either - [Helm, 2021](#)
- What about judges?
 - No, especially not in sentencing - [Goodman-Delahunty and Sporer, 2009](#)
 - But scientific training can help - [Kovera and McAuliff, 2000](#)

3.4 Insanity

- Both cognitive (competency) - [Miller and LaDuke, 2024](#)
- and psychiatric (insanity) [Gardner et al., 2018](#)

3.5 Society, Development, and Personality in Criminal Behavior

- No easy answer to this...

 Important

How psychology and the law ought to interact is just as much a question of morality and ethics, as it is science

The instructor-provided glossary may not include all terms worth memorizing, make sure you consider using the vocabulary list in your book and your own judgment to make sure you have all relevant terms
